MADISON WHITE WASH UNDERBED DRAWERS

SKU: 310113

Badcock of South Florida & more[®] HOME FURNITURE

Save space with the three storage drawers. Solid wood construction. Use with Madison bunk beds.

People may not realize, but storage space can be some of the best real estate in a home. Especially under the bed, this spacious area can be one of the handiest hidden gems, if you make the most of it. Instead of just conventionally stuffing things underneath the bed, consider a better storage solution, such as a storage bed with underbed drawers. As there's a lot of storage space under the bed, the problem is keeping items contained, organized, and easily accessible. Designed in materials such as metal, wood, fabric, etc, the right underbed storage drawers can make all the difference. At Badcock Furniture & More of South Florida, our convenient showroom locations offer high-quality bedroom sets, including our Madison White Wash Underbed Drawer collection, which covers all the bases, offering spacious and economical storage options. Madison Grey Underbed Drawer Collection

The Madison Grey Underbed Drawer collection is a clever storage solution to transform your unused space into a place to neatly organize your belongings. These three white wash drawers constructed of solid wood are aesthetically pleasing and convenient to use with our Madison bunk beds. Store clothes, toys, linen, shoes, whatever you want to organize out of sight, but still within easy reach. Roll the drawers out for access, and free up some well-needed space in the cupboard or closet by storing them in these drawers under the bed. When you are done organizing, close the drawers and hop in your bed for some well-deserved relaxation. Underbed Storage for Every Style

If you are storing something under your bed, style is probably not your first priority or concern. Organization is key, and especially for kids and teenagers, their bedrooms can get quite messy. Whatever you are looking to stow away, underbed storage is well-worth considering. If you have even greater storage needs, why not try a bed frame with built-in storage?
